List of Tables

3.1	Parameter estimates from regression of mpg on weight.	6
-----	---	---

List of Figures

2.1	An example figure.	4
2.2	Another example figure.	4

Acknowledgements

I would like to thank . . .

Chapter 1

Introduction

1.1 Background information

- text 1
- text 2
- text 3
- more text
- more text

1.2 Literature review

One important development was made by Abrams, Gillies, and Lambert (2005).

Chapter 2

Methods

2.1 Important main method

Initial modelling was performed using linear regression as defined in equation (2.1).

$$y_i = \beta_0 + \beta_1 x_i + \varepsilon_i, \varepsilon_i \stackrel{iid}{\sim} N(0, \sigma^2) \quad (2.1)$$

2.2 Additional method

- text 6
- text 7

An example of a figure is shown in Figure 2.1.

And we can include image files directly, such as Figure 2.2.

Figure 2.1: An example figure.

Figure 2.2: Another example figure.

Chapter 3

Results

3.1 Main results

And here is an example table of regression coefficients in Table 3.1.

Table 3.1: Parameter estimates from regression of mpg on weight.

	Estimate	95% CI lower limit	95% CI upper limit
(Intercept)	37.29	33.61	40.97
wt	-5.34	-6.44	-4.25

Chapter 4

Discussion

4.1 What I found

Appendix

R code

```
model <- lm(y ~ x1 + x2, data = df)
summary(model)
```
